

Material Pump Station

Material-preparation, stirs, evacuates, pumps

Material tank for Dielectric	35 L
Material tank for Phosphor	22 L
Material tank for Silver / Carbon	22 L
3 Material Pumps	up to 250 gr./min
Material pressure	up to 80bar
Squirrel motor	0,37 kW
Speed	140 min ⁻¹
Vacuum pump	0,37 kW
Electric connection	380/230V50Hz 16A
Air pressure	6bar

Dimensions

Length	800mm
Width	1'350mm
Height	1'800mm
Weight	ca. 480kg

Material tanks with stir motors in open position for filling with the material

Pumps with material-block for the connection of recirculation hoses. Material pressure indicator and material hose connection to the material outlet valves for each material component.

Front panel with switches and push buttons and the inside of the electric box.
